

The new extensional options for our bbe FluoroProbe

New parameters can be measured

We thought about how to extend the measuring options of our bbe FluoroProbe. For longer time there was no sufficient solution. But now we found it:

The extension with an oxygen sensor makes it possible to measure next to the excellent chlorophyll analysis the content of oxygen in the sample water.

This way you are able to measure all your parameters of interest in one dive! The measured data of the external sensor will be integrated in the bbe++ software.

Sensor	Range	Resolution	Accuracy
DO	0-45 mg/l	0.02 mg/l	± 0.4 mg/l
	0-200 % O ₂	0.03 % O ₂	± 0.1 % O ₂
